WORK EXPERIENCE

Omio

Prague, Czech Republic

Software Engineer Jul 2021 - Present

Part of the B2B Team, helping them build products for Omio Partners. I contribute mainly on frontend, using JS/TS, React, REST API, GraphQL, and also do some backend work writing Golang.

OAK'S LAB

Prague, Czech Republic

Software Engineer Jul 2019 - May 2021

Worked with different tech startups, turning their ideas to reality from scratch using JS/TS as a tech-stack such as React, GraphQL, NodeJS, Ant Design.

Accenture Philippines

Manila, Philippines

Senior Software Engineer Jan 2019 - Jun 2019

Former resident in Accenture Liquid Studio, worked under the AI Global Asset Development team and helped them develop Accenture's Proof of Concept projects (POCs) for Robotic Process Automation (RPA) and AI-related projects such as Machine/Deep Learning, Computer Vision, and NLP/Bots.

Tech One Global

Manila, Philippines

Software Engineer Nov 2017 - Dec 2018

Created applications that engaged our customers with digital transformation through integrating various Microsoft Azure technologies to their businesses such as Bot Framework, Cognitive Services, Graph API, Logic Apps, Language Understanding and Intelligence Service (LUIS), and emerging tech.

Microsoft

Manila, Philippines

Microsoft Student Partner Oct 2016 - Oct 2017

Engage audience with Microsoft technologies such as Office 365, Microsoft Azure, and Windows 10; run workshops and hackathons; hosted tech events and give demos on campus; worked alongside with Microsoft professionals, assisting them during hackathons and events.

EDUCATION

Lyceum of the Philippines University

BSc in Information Technology, 2014-2018

GWA: 1.59 / 1.00
