EXPERIENCE

● Jul 2021 - Present

Omio | Prague/Berlin

Software Engineer

Part of the B2B Team, helping them build products for Omio Partners. I contribute mainly on frontend, using JS/TS, React, REST API, GraphQL, and also do some backend work writing Golang.

● Jul 2019 - May 2021

OAK'S LAB | Prague

Software Engineer

Worked with different tech startups, turning their ideas to reality from scratch using JS/TS as a tech-stack such as React, GraphQL, NodeJS, Ant Design.

● Jan 2019 - Jul 2019

Accenture Philippines | Manila

Senior Software Engineer

Former resident in Accenture Liquid Studio, worked under the AI Global Asset Development team and helped them develop

Accenture's Proof of Concept projects (POCs) for Robotic Process Automation (RPA) and AI-related projects such as Machine/Deep Learning, Computer Vision, and NLP/Bots.

● Nov 2017 - Dec 2018

TechOne Global | Manila

Software Engineer

Created applications that engaged our customers with digital transformation through integrating various Microsoft Azure technologies to their businesses such as Bot Framework, Cognitive Services, Graph API, Logic Apps, Language Understanding and Intelligence Service (LUIS), and emerging tech.

● Oct 2016 - Nov 2017

Microsoft Philippines | Manila

Microsoft Student Partner

Engage audience with Microsoft technologies such as Office 365, Microsoft Azure, and Windows 10; run workshops and hackathons; hosted tech events and give demos on campus; worked alongside with Microsoft professionals, assisting them during hackathons and events.
